[REDACTED]

1. Your memorandum of 25 May 1950 requests our advice in regard to the propriety of permitting disclosure of the circuit diagram related to the basic contract, also the dollar value and number of units concerned.

2. It is our understanding that Communications does not want this unit produced for sale on a commercial market, and for that reason the request from [REDACTED] appears to be moot.

3. The file is accordingly returned herewith.
